

# Sask. Dry Areas Have Better Yield

## ACCUSED NEGRO KILLS DEPUTY

WAYNESVILLE, N.C., Sept. 7.—Deputy Sheriff Bill Ray, 28, who was born here, was killed by an old Negro, after Ray sought to arrest him, died in Haywood County hospital.

Large crowds milled about the county jail, where the Negro, wanted for attacking a young white girl, is held.

Sheriff J. A. Lowe said the Negro had been accused of killing his wife for safekeeping, and was confined to maintain order. Four or five other Negroes were held.

In connection with the case, Sheriff Lowe said he had been advised by the Negro that he was under contract to the sheriff.

Deputy Sheriff Ray is survived by his wife and one child.

## HOLLYWOOD GOSSIP

INTIMATE GLIMPSES AND  
INSIDE STUFF ON THE  
MOVIE COLONY

By DAN THOMAS

HOLLYWOOD, Aug. 7.—It's not often that a native daughter makes good in pictures. But now Marion Burns has come along to share honors with her mother in a lot of traveling to get from her home to the inside of a studio.

Marion was born and raised in Hollywood. Her home was exactly the same as her mother's, and she had to travel 12,000 miles before she got to the road to success and is back living in the same old family home again.

Here's a new record of sorts. Wally Beery hasn't attended a Hollywood party for 15 years. His wife, actress Anna Dina in 1917. "What's the use of having a home if you want to go gadding around the world?" she emphatically. Mrs. Beery agrees with him. There are two facts we bet you never heard of: one, the real name is Harry Lillis Crosby. Boston Keaton holds a license as steam engineer for Great Lakes steamers.

We certainly are going to see enough jungle pictures during the year to come. The success of "Tarzan" — M-G-M plans to make three more Tarzan pictures, and the first is a jungle story, as yet untitled. And the Columbia studio is rushing preparation on a feminine jungle story. And we're going to see it—if anything? Rosalie Corte has achieved her ambition to be the only female player in a picture. And roles in "Thirteen Women."

Just as a point of technical information, an average of four exposures are used for recording the sound in every scene you see on the silver screen. In some scenes, of course, one "take" is sufficient. But there are other scenes for other scenes to bring the average up to four. The recording of orchestra music, for example, necessitates a lot of the little instruments.

## AMUSEMENTS

### RIALTO

The same mental and physical characteristics, which combine to make a good golfer, are needed to make a good tennis player, who is considered a very good sport. And there is also a pretty good game to be had in tennis.

"Horror Features" will continue at the Rialto.

It is the opinion of the manager that the best way to keep the audience interested is to have a variety of attractions.

He has been brilliant directed by Jack Harkness.

Hugh Wakefield heads an important cast as Ridgway, Emworth, and the rest of the gang.

The rapid-fire talking member of the Four Brothers team, "Horror Features" will be continued at the Rialto.

He has been brilliant directed by Jack Harkness.

## AVERAGE IN SOUTH TO BE 14 BUSHELS

### Very Few Places Will Not Harvest Better Crop Than Last Year

REGINA, Sept. 7.—There may not be plenty of wheat in some of the drier-out areas of southern Saskatchewan, but reports received from the south indicate that the wheat crop will not harvest a better crop than last year.

Reports are general, a better estimate can be made of the wheat crop in the south. The average yield for the south of the province at about 11 bushels per acre, and in general this week the wheat is of good grade with few exceptions. The yield is much better than last year.

Most reports show a high yield for the south, but the same is not true for the north. The same is true for the north, but the same is not true for the north.

Wheat is the only grain to be harvested now.

RAINS LOWER GRADE

Rains, after cutting had started, have caused a great grade in every section, but the grain is plump and good progress is being made.

Crops are fairly heavy in the western and eastern sections of the province, and in the central and drier-out section of the last three years a fairly good yield has been harvested.

The Gainsville district appears to be poor, and the same is true of the area of Graveline where no crop was harvested.

Wheat is heavy in the north.

RAINS LOWER GRADE

Rains, after cutting had started, have caused a great grade in every section, but the grain is plump and good progress is being made.

Crops are fairly heavy in the western and eastern sections of the province, and in the central and drier-out section of the last three years a fairly good yield has been harvested.

**IF IT WILL HELP ALBERTA THE EDMONTON BULLETIN IS FOR IT**

**WEDNESDAY, SEPTEMBER 7**

### A CONFERENCE ON WHAT?

Washington would like the world economic conference to avoid the discussion of war debts and reparations.

On the same principle the disarmament conference should keep clear of any suggestion about cutting down armaments and navies.

War debts and exclusive tariffs have done more to kill trade than armaments have done to kill progress toward a more friendly international relationship.

If the proposed conference is to say nothing about the crushing effect of war debts upon industry, and the success with which international trade has been damaged by tariffs, it will make little difference whether the conference is called at what it may do. It will not in these circumstances be of economic conference and can not deal frankly or effectively with world economics.

### GERMANY 'TELLS' THE WORLD

Germany has solved notice on France that it will break with the disarmament conference and proceed to arm itself on land and sea unless the other signatories of the Treaty of Versailles break their armament agreements and agree to do the same.

That may not be a good way for Germany to argue with France. If history counts for anything it isn't. France suspects that Germany is really armed more than it admits, and that it will be later. It is not the secret of the strength of the invader. That is the only possible explanation of why France has spent hundreds of millions of dollars in building up a more powerful armament than it had when the great war began.

The conference will probably open the reactions at London, Rome and Washington. That France will reduce its armament without harm and fast guarantees of help if it is attacked there is a little encouraging prospect, even though it is not clear that the French are willing to make any promises to the disarmament. After all, one talk about "rapprochement" French faith in Germany's promises is weak.

While Berlin addressed the note to Paris, its message of defiance is addressed to all the countries which signed the terms of the Treaty of Versailles and compelled its representatives to sign the dotted line.

### THE NINETY-CENT DOLLAR

New York graciously condescended to admit that Canada's gold dollar was worth ninety cents on Saturday. The joke is that if any Canadian in New York wanted to change his gold dollars for United States dollars he would have to pay a premium of 10 cents. He got United States silver certificates, each one worth 25 cents at the present price of silver.

It must make the alchemists turn in their graves if they hear that New York can buy one hundred cents worth of Canadian dollars for 90 cents. The twenty-cent United States dollar is worth less than a cent.

London—Opinion in well-informed military circles is that the disaster to the Greek army at Asia Minor is complete. The Greek government, however, is still trying to get the Allies to arrange an armistice with the Turks.

Montreal—R. H. Sam. Hughes says there is no truth in a report that the Kaiser refused to allow him to witness the manoeuvres of German troops.

Ottawa—An official report shows that Canada imported imported butter last year by ship-load.

Bethel—The Zepplin is planned which will be capable of sailing in the next forty days and traveling from 1500 to 1800 miles.

Medicine Hat—The taxpayers approved a bylaw for \$300,000. to install a water and sewer system.

of the people of Canada that while thousands of immigrants and their families may have been moving into the country, the native born, who are still on foot, there has been no serious development of criminal tendencies among them. No man who has not gone through the experience can know the temptations that come in the way of the homeless man who finds himself destitute and among strangers.

The efficiency and watchfulness of our police forces is of course not to be forgotten, and has probably not been forgotten. The world, however, is not so far removed from the fact that recognition is due that the transients have not in any general way turned criminal, despite circumstances which offered them countless opportunities. A large share of crime is committed by men who are not transients, but who find themselves destitute and among strangers and respect for law.

Something ought to be done for the transient, other than order him to move on. Move on, where? That is the question that confronts him. No municipality will accept responsibility for him, and another power, not the federal government has definitely taken him in charge. It is time for a change in that respect, both in fairness to the migrant himself and as a means of protecting the public against the possibility that he may be beaten or driven into crime.

### Forty Years Ago

From the Files of the Edmonton Bulletin

The citizens of Calgary have sent to the mayor and town council a joint letter, calling attention to the fact nobody has been punished yet for the raid on the Chinese laundries, and asking that action be taken. It is signed by Rev. Messrs. Cooper, Hume, Denyer, Lethbridge, and Mr. and Mrs. Frank Lathrop, who was in town when the letter was drawn up, refused to sign it. A special meeting of the council will be called to deal with the letter, the signers will be asked to attend, and it is probable they will be able to explain to the council the parties to be prosecuted and how to proceed.

Four Russian immigrants were stricken with cholera in England.

George W. Curtis, the well known New York actor, is dead.

Thirty thousand immigrants have reached Winnipeg this season.

Another rebellion has started in the Argentine republic.

There is a movement in Quebec to abolish the right to appeal to the privy council.

The town of Edmonton is offering a reward of \$500 for information leading to the conviction of parties starting racing fires in the town.

### THIRTY YEARS AGO

Cape Town—Dr. Jamieson makes his first speech in the Cape Parliament yesterday.

He said a bad hundred thousand francs had been done, and he thought the affair might now be forgotten by fair-minded men.

A Prince returned Monday from a five months' trip to eastern Canada.

Mr. Gregg, of the Post, returned yesterday from Montreal.

Stetson W. Anderson returned last night from Boston.

Dr. F. K. Karpasnick and St. George Jellicoe have returned from a trip to Rocky Mountain House. They came down the Saskatchewan in a canoe.

C. Messiter, of Thornbury, Gloucestershire, England, is in town. He visited Edmonton in 1862.

### TWENTY YEARS AGO

Montreal—"Rody" Ryan, nationally known railway contractor, was killed when he fell down an elevator shaft.

London—Hon. Sam. Hughes says there is no truth in a report that the Kaiser refused to allow him to witness the manoeuvres of German troops.

Ottawa—An official report shows that Canada imported imported butter last year by ship-load.

Bethel—The Zepplin is planned which will be capable of sailing in the next forty days and traveling from 1500 to 1800 miles.

Medicine Hat—The taxpayers approved a bylaw for \$300,000. to install a water and sewer system.

### TEN YEARS AGO

Montreal—A Turk cavalry division was caught between two retreating Greek army corps near Brusa and wiped out. The Allies appear to be that it is necessary for them to land forces in Asia Minor for the protection of their nationalities.

London—Opinion in well-informed military circles is that the disaster to the Greek army at Asia Minor is complete. The Greek government, however, is still trying to get the Allies to arrange an armistice with the Turks.

Montreal—The Canadian government has agreed to pay a tariff of 2 million dollars.

Edmonton building permits for the year total \$1,000,000.

Smith—Machinery and supplies are being sent to Caribou Island, on the north side of Great Slave Lake, where the Aurora Gold Mining Co. will commence operations.

### King Bird Courage

By Edgar A. Guest

Every summer flocks I know

I watch the king bird chace a crow,

And the great black bull with flapping wings

Which hark his little brother's braver heart.

Rise above him to import,

"Go to it, midget!" I shout in glee,

"And seek him a couple of times for me!"

Now the crow is trouble. When he appears

Every little bird for her next egg fears.

He's feathered bully and mean and sly

And neither bird trembles when he drawls high,

For he's a king bird, and he's young,

And I'm sure by none are his proucs sing.

But the king bird, less than a tenth his size,

Can chase him out of the summer skies.

Men, if you're worried or frightened sore

At the troubles you've had for a year or more,

If you stand afraid of what may draw,

Don't be afraid, for the king bird is here,

All that you need in this world is place.

Just think, when your courage seems running

low.

What a king bird does to a monster crow.

"If any man will do His will he shall know of the doctrine." —John 7:17.

Tomorrow's text will be selected by Rev. Nels Carlson, Lutheran church, Camrose.

### The Passing Show

By J. S. Cooper

I saw a real live mudist a few days ago.

He is not a member of the Sons of Freedom nor a law-defier of any kind—and he was fully clothed.

He is a member of the Bar of Alberta and holds municipal office in his district. He would be rated as a good man, but you would not be inclined to apply. He is a devotee of good food, both of body and mind. Except his wife, who shares his healthy tastes, not a soul in his district has any idea that he practices nudity on occasions, and thinks it is a good health benefit. He is fortunate like myself, in having a place where he can be around in the raw without any risk of giving offence to his neighbors.

At the moment of writing I am speedily coasting along the Canadian National train and will spend a few days at a medical conference which never gives me a chance to sit down. I have never seen what the birds or an occasional deer can prey. I feel tempted to try out my pleasure.

The only other sympathizer I've met yet—and he does not seem to be more than a sympathizer—is an official of the Department of Health who loves me. "An old friend," "Auntie Nudist." It's significant that this devoté and this sympathizer with nudism, should both be men of middle life, devoted to the cult of health and that each should be a pillar of the community.

Curiously enough, when nudism is present, it is more often a sign that something is wrong with the intestines, than that the liver is at fault. When several medical men bore testimony to the value of sun-bathing in the prevention of sun-rash, success was attributed to the use of artificial sunlight as an antiseptic in over 200 surgical cases was reported.

Dr. Frank P. Corrigan and Dr. William Bouknight, both of the St. Alex Hospital at Cleveland, Ohio, conducted a paper on the subject. Dr. Bouknight said he had been led to recognize the antiseptic possibilities of sun-bathing, while practicing in the Atacama Desert in Chile. He said:

It became our custom to expose badly mangled hands, arms and legs to the sterilizing influence of the ultra-violet rays in the hot sun.

The effects were so unmistakable as to leave no room for doubt.

At a recent of this experience in Chile the doctors have installed artificial sun-ray lamps which radiate virtually the same wave-lengths of ultraviolet as result in the sun in sunlight filtering through the atmosphere in summer.

There is special difficulty in keeping certain types of wounds free of infection. There are difficulties in keeping certain skin areas sterile.

The lamp has been used on the perineum, on abdominal wounds slow in healing, small puncture wounds, accidental lacerations and skin grafts.

Light alone can accomplish the doctor's benefit to be derived from sun-bathing.

As the artificial lamps do more than sunlight alone can accomplish, the doctor points out the benefit to be derived from sun-bathing.

It is less than 120 years since the domestic bath was regarded as dangerous by a medical profession.

The city council of Boston passed a bylaw prohibiting people from taking baths except on the advice of a doctor. Sun-bathing, which has greater health and antiseptic value than water-bathing, will some day be regarded as a daily essential of health.

Artificial modesty will undergo some changes, no doubt. We may even get back to the standards of the ancient Greeks.

Editor—To those who are interested in the African tribes, the Mungos of Andaman Islands, the northern Nigerian and the people of Pongi Island, whose women only wear clothes around their waists, will be of interest.

Reference to the "Jinjin Hutchinson" life story

which was published in the Atlantic safely, will forgive the printer's error.

Bret Harte who used to run a paper in a western mining town in the early days tells of the shock he received when he first saw a woman in a bikini.

He had written, "The deceased lady was widely known for her charity." The printer made it appear that the lady had been known for her modesty.

Harte caught the error on the proof and marked it with a question mark. He got a joke written.

He had amended it to read, "The deceased lady was widely known for her charity?"

Treatment of nervousness must be through and by the aid of the medical profession. Sweet garments of rest and quietude, and a nervous system adjusted to modern methods of living, especially to the more congenial life in cities, the multiplication of interests and opportunities, are the best treatment for nervousness.

Why should we have so many buttons and use less buttons at that. Many a man feels naked if he loses a button off his coat sleeve, without having the slightest use for it, or even knowledge of how the button fits.

Men should not be afraid to wear a bikini, as pocket handkerchiefs. Accordingly an admiral ordered buttons sewn on. Yet even the most civilized man would not think of wiping his nose with a handkerchief.

Women should not be afraid to wear a bikini, as pocket handkerchiefs. Accordingly an admiral ordered buttons sewn on. Yet even the most civilized man would not think of wiping his nose with a handkerchief.

# May Reduce Number C.N. Directors

## SLASH MAY BE RECOMMENDED TO DOMINION

### Enquiry Commission Will Likely Ask Decrease

From 17 to 5

OTTAWA, Sept. 7.—Reduction in the number of directors of the Canadian National Railways may be recommended in the report of the trans-Canada railway enquiry which will be placed before the Dominion government on Saturday or early next week.

The present personnel of the board is seven, and these directors are to be from the Canadian and Quebec provinces.

Rumors are that the enquiry commission will likely recommend a decrease to seven or more, probably five.

#### "UMPIRE BODY" LIKELY

With the railways to maintain their present structure, at this point there has never been any doubt. The possibility exists that some kind of "umpire body" may be set up. If constituted, this would be for the purpose of carrying out certain recommendations made by both the Canadian Pacific and the Canadian National Railways. On this question, it is understood that the commissioners will be asked to report when they convene again for the signing of their report.

There are no laid on proposals for economies. A rumor that the commissioners might suggest improvements in the operation of railways by an increase in freight rates is given no credence. On the other hand, it is understood that it is to be the view of the commissioners that higher rates do not carry a heavier freight rate. Any increase in passenger rates, it is intimated, would be bad business to the buses and automobiles.

#### TABLE REPORT IN HOUSE

The report will be tabled in the House of Commons on the first of the coming session. The question whether or not the document will be read in the House of Commons meets remains for decision.

With Mr. Justice P. Duff of the Supreme Court of Canada, the commissioners have given much thought to the problem. When the document is finally completed, it will represent the joint opinion of the two standing committees, one British and one United States railway authority.

#### American Railroad Man Says Business Now Improving

There is a definite upward trend in Western Canada and the United States is the conclusion reached by Robert H. Miles, treasurer of the Canadian Pacific Railway, who is an Edmontonian visitor today on a routine trip through this territory.

"Conditions are generally definitely on the upgrade I have found, and there is a much more optimistic attitude. The people in the West are feeling better and both in grain and fruits Western Canada and the West Coast are in the 'up' of the 'crop,'" he said. "The big crops have created considerable demand for grain, which has resulted in trades in Eastern Washington, Northern Idaho, Montana, and in the prairies, a gratifying bettering of business conditions."

Mr. Miles, who is traveling on the Pacific, while not as heavy as formerly, kept up well mainly through the West Coast. He attended the Legion convention and seventy other major conventions held in that territory. He has been traveling through Canada both going and coming to the Pacific and the Canadian railroads benefited a large extent also.

#### Police On Lookout For Train Robbers

Local residents of the area are being searched by city detectives and a general check-up on highway traffic in Northern Alberta is being made by the Royal Canadian Mounted Police in a wide effort to round up bandits. The last major robbery came from Winnipeg to Calgary, August 29. Police in all Alberta towns and cities are on the alert. Part of the stolen goods consignment being offered for sale.

Information obtained from a freight train was smashed open when a west-bound train crossed the North Saskatchewan River on August 29 and goods valued at close to \$500 taken. The robbery was the second in the last two months. It is believed that the robbers traveling in a car headed north soon after.

## Whata Toothache!

The dentist's usual request to "open wider, please" was hardly necessary when an operation was performed to remove two abscessed teeth from the mouth of Maud, aged elephant of an Atlanta, Ga., the other day. It was a job for three men instead of one, as this picture shows.

## "Kid" Baby Bull Moose Addition to Local Zoo

### UNITED CHURCH PLANNING FIVE BIG PARLEYS

#### Dates Announced for Missionary Gathering on Large Scale

TORONTO, Sept. 7.—Conferences with the Canadian and American United Church Missionary and Maintenance Fund will be held in the eastern and western districts of the United States and Canada for next month at six centers in Ontario and the western United States.

Sept. 7—Guelph, Ontario. Conference at Stratford, Ontario.

Sept. 7—Montreal, Quebec. Conference at Guelph, Ontario.

Sept. 7—Montreal and Ottawa. Conference at Guelph, Ontario.

Sept. 7—Montreal. Conference at Guel

# Progress Reported In Treatment Of Cancer By Radium And Electricity

## CLAIM SUCCESS 60 PER CENT. CERTAIN CASES

Maintain Radium Superior to Surgery in This Type

Treated

NEW YORK, Sept. 7.—Radium and electricity in treatment of cancer have their respective advocates at Tuesday's session of the American Congress of Physical Therapy.

Dr. Harold Swanson and Arthur E. Peiley, of Quincy, Ill., in a joint paper on radiotherapy, said the treatment of cancer peculiar to women, reported success in 60 per cent. of cases of this type treated before the disease had progressed beyond the first stage.

Radium is superior to surgery in these cases, they maintained.

Dr. George C. Goss, Chicago urologist, indicated at the congress today, discussed the present status of the use of the employment of high frequency currents (for surgical purposes) in cancer.

"In a great many instances," he declared, "the results surpass those that can be obtained by the use of the cold knife."

### CANCER STILL RAFFLES

Dr. Nikola Tesla, inventor of the high frequency currents apparatus said cancer still baffled the medical world, but he believed the current of 100,000 amperes in conjunction with the malignant growth more or less.

High frequency currents pose a great advantage over radium," he said. "They do not endanger the patient, and the results are always hazardous, being difficult to confine to the precise region to be treated, and the danger of damage in the use of x-ray."

The great difficulty which confronts the medical world in eradicating the cancerous growth is that of preventing some of the cells in the body from passing into the system and blood streams through the system. I have known of numerous very rare cases in which cancer developed in some other part of the body."

### TOO TEMPERATURE CONCERN

In a speech on Air Therapy, Dr. William T. Johnson, of the University of Pennsylvania graduate hospital, said the temperature of the air is a prime factor in developing colds.

He said it is a "basic factor" that the tendency to cold is a prime factor in developing colds.

He said that the tendency to cold is a prime factor in developing colds.

"Protection should be from within, not from without," he said.

In a speech on the effects of sea level climates which subject the winter extremes are held to be lower than those where temperatures are more uniform.

## BIRTHPLACE OF PARKER SORROWS

BELLEVILLE, Ont., Sept. 7.—Death of London yesterday of Sir Gilbert Parker, famous author, caused deep sorrow in this district, as he had many friends here who visits here and some years ago purchased a home in Belleville where he died after a long illness for many years.

On Sept. 23, 1860, he was born November 23, 1860, is a few miles north of Naperville, in the United States, where he received his early education. He taught school at Holloway, a few miles north of London, and afterwards was attached to the staff of the school for the deaf. After his graduation he was offered a post as a teacher to the late Canon Blentworth, of London. Like the dead he attended Trinity College, Toronto, and paid his way through that school by giving extra tuition and education instruction he gave.

Sir Gilbert's wife, who died in 1912, was a widow, and his son, but it is not known here if his son will be brought to this country.

Surviving Sir Gilbert are a sister, Mrs. Beauchamp, of London, and two brothers, Harry, Sir Paul, and Arthur, whose whereabouts are unknown here.

## PLANES BOMB BRAZIL FARMS

RIO DE JANEIRO, Sept. 7.—The Ministry of War, today said that seven navy planes had bombed and destroyed Fort Iguape at the mouth of the Tijuca River.

The Navy had an agreement with the San Paulo rebels not to interfere in hostilities, but the ministry said that the rebels had been bombing aeroports dropping munitions over Montevideo.

For the authorities regarded the incident as significant since they held the possibility of the navy joining the rebels in their destruction. Some even believed the navy might abandon its semi-autonomous status.

LA QUIQUA, Argentina, Sept. 7.—Despatches from Villazon today said anti-aircraft guns have passed there on the route to the Chaco. It is the first time the guns had been pointed to Paraguay or Bolivia.

### SMALL FOOT ATTACHED

LA PAZ, Bolivia, Sept. 7.—An official here today said strong Paraguayan patrols have attacked a defense post protecting a small fort on the border. The patrols were repulsed and pursued by Bolivian troops. There were no further details.

## King of Locksmiths Lends His Talents to Open Safes On Lost Treasure Ship

Man Who Learned to Pick Locks in Marine Corps Aids in Recovering Millions Locked in Hold of Sunken Vessel Beneath Waves of the Atlantic

CHARLES M. COURTNEY

BY MARION KINNAIRD

NEW YORK, Sept. 7.—A Yankee who learned how to pick locks when he was a marine in the Navy is helping to divest the treasure of the sunken liner Egypt.

Charles M. Courtney, king of the professional safe-crackers, is back in the United States with another spectacular list of thrilling experiences. He was the expert called in to advise the divers who are recovering the millions of gold and jewels from the sunken liner Egypt.

Courtney, a descendant of the famous King of Prussia, King of the Prussian Army, and King of Prussia, was born in 1887 in Kiel, Germany, and has been a professional safe-cracker for 20 years.

He has been led to receive another interesting assignment in Europe, this time to help recover the underground treasure room in the castle of Prince Heinrich, near Kiel.

### DESCENDANT OF VERNE

Courtney, a descendant of Jules Verne, is president of the American Safe and Lock Association.

He has been opening safes and locks for 20 years, and his feats—all of them legal—have won him the title of "King of Safe Crackers."

The "King" of safe cracking is the greatest safecracker in the world, and his work is success beyond compare.

Courtney never opens a safe or lock without the knowledge or assistance of the owner or his heirs.

The difference between a burglar and a locksmith, he says, is that the burglar is in to get in and he will do all kinds of damage in order to get in, while the locksmith is in to get in and he will do all kinds of damage in order to get out.

This professional safe-cracker is the greatest safecracker in the world, and his work is success beyond compare.

This professional, but legal, safe-cracker, who began his career when he was in the United States marine corps and was placed in the brig corps, has been opening safes and locks for 20 years.

He has been opening safes and locks, and several of his company's clients have been issued with bread and three pans of sugar to help them get out of the ship's galley. They have been issued with bread and three pans of sugar to help them get out of the ship's galley.

The captain himself came down to investigate, but finding the men were not robbing the safe, he locked up, gave up the case and the mystery of the missing bread and sugar.

When Courtney was called to advise the divers to open the treasure room of the sunken liner Egypt, he was told that the safe was the largest ever made.
